The screenshot displays the MongoDB Atlas Charts configuration interface. On the left, the 'FIELDS' section lists available fields: **A** _id, address, **A** borough, **A** cuisine, grades, **A** name, and **A** restaurant_id. The 'CHART TYPE' is set to 'Grouped Bar'. The 'Encode' tab is active, showing three sections: 'X Axis' with a '+ Aggregation' drop zone, 'Y Axis' with a '+ Category' drop zone, and 'Series' with a '+ Category' drop zone. The right side features a 'PREVIEW' section with buttons for 'COMPLETE' and 'SUBSET'. A dark overlay box contains the text: 'Fields are used to build charts. They can be dragged from the Fields section on the left and dropped in the drop zones in the Encode section on the right.' with a 'Next' button.
